Navigation and Safety Equipment

Tracking and Timing

This year Rally Kazakhstan will use a timing and tracking system provided by rally specialists Sporttraxx

The system will use Iridium Satellite and GSM based tracking. No additional brackets or cables need to be purchased for this system but will be provided and installed by Sporttraxx during technical verifications. All vehicles need to arrive at Technical Verification with a power supply connected directly to battery; this open end cable needs to be made available on the dashboard, on the co-driver side. For motorcycles the cable needs to be situated under the instruments tower.

For motorcyclists, the main device will be fixed on the bike and the small wireless remote control will be carried on their person. For cars it will be fixed to the vehicles roll cage and the remote control will be accessible on the dashboard. No external antenna is required. The internal batteries last for the entire duration of the event.

There will be a deposit taken at event registration on for the safe return of the Tracking and Timing Equipment.

Instructions for the use of the device are available here <http://goo.gl/mijNoq>

Navigation and Sentinel

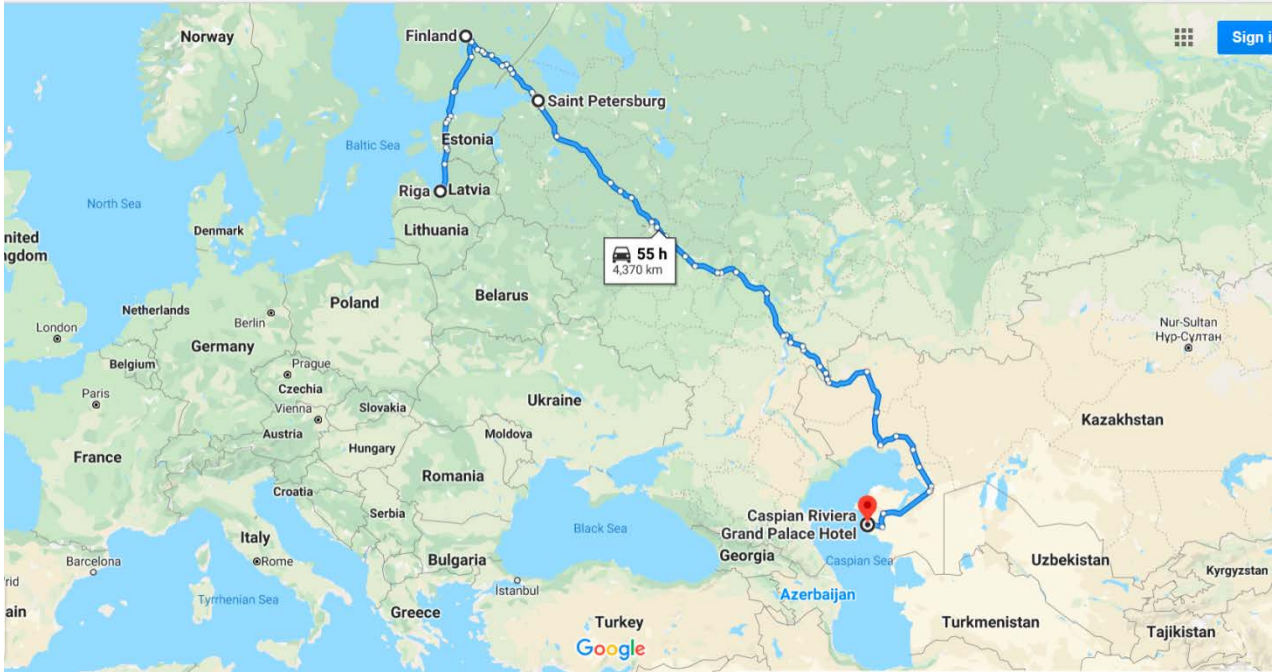

The AMFK will continue working with ERTF to provide navigation and sentinel for competitors. The cost of these devices is not included in the Entry Fee, and must be paid directly to ERTF.

Further information about the systems and technology that will be used in 2021 can be found on Rally Kazakhstan official website www.rallykazakhstan.com.

Healthcare and Medical facilities

The general standard of healthcare in the Kazakhstan is high, both in the public and private sectors, although private hospitals have some distinct advantages (predominantly English-speaking, less waiting time, less cultural restrictions).

Medical facilities are of a very high quality but are extremely expensive. Private health insurance is essential, and highly recommended.

Pharmacies are open 24/7.

Photography

Normal tourist photography is acceptable, but it is courteous to ask permission before photographing people.

In general, photographs of government buildings, military installations, ports and airports should not be taken.
